

**FREE PROGRAM**

# Music for Boys

*Music For The Boys is a 9 week program for 10-16 years olds.*

Boys will have opportunities to **write songs, create beats, play music** with each other, or simply share and talk about their favourite music and what it means to them within a small group.

Music is a core part of our identity as we grow up and can provide ways to communicate and express oneself like nothing else. By exploring and sharing music we can develop a better understanding of ourselves and build resources that will benefit other areas of our lives.

This program creates a safe setting for boys to explore the benefits of music together.
